Time to be creative...

EAT·N

Powering Business Worldwide

unlock your creativity...

Developed to work in a wide range of demanding situations, with specific considerations for live events & hire, touring productions, multi-purpose venues, theatres and educational applications. FLX is adaptable and upgradeable with channel additions and multiple Wing options.

USB (x 5)

EtherCON

Internal PSU

Multi-touch display

PowerCON TRUE1

Reliable FE-RAM

Arm processor

Scratch resistant coating

Dual skin construction

Encoders tested to 1 million rotations

Live events, rental, theatre, touring productions, multi-purpose venues, festivals,

Quick and Simple
Tools such as 'RigSync' & 'Auto Palettes' do all the prep work, getting you ready to operate quicker than ever before.

Colour interfaces
Choose to use encoders, colour faders, multi-touch colour picker or even import your own pictures into the image picker.

User Definable Keys
Use UDKs for blinders, smoke machines and houselights etc, or use for functions such as 'Highlight', 'Park' and 'RemDim'.

RigSync
Automatically syncronise your console with your rig, without the need to understand DMX or think about patching.
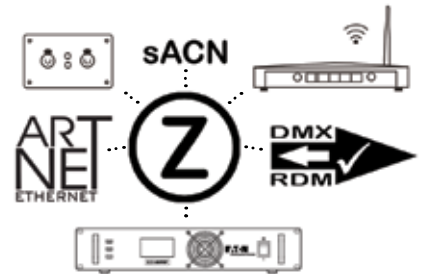

ZerOS Wing
Up to 6 ZerOS Wings can be added to the FLX console to increase the number of channel or playback faders available.

Filter lookups
Filter lookups are grouped into common emotions such as 'Anger', 'Royalty' and 'Love', chosen to work really well together.

Networking
Add scalability and power with ArtNet 4, Streaming ACN, RDM, tracking backup, media servers, Apps and visualisation.

Show Control
Synchronise your show by using MIDI Show Control, MIDI Timecode, real time triggers and contact closures.

Apps for iOS and Android
'Remote' enables wireless control of your rig, while 'Monitor' emulates an additional wireless external touchscreen.

FeRAM ('Auto save')
Stores every button press you make, as you make it, to ensure you never lose any work in the event of a power outage.

Visualisation
Support for a range of visualisers allow you to preview your show when you don't have access to the venue.

Universe upgrades
Upgrade in individual universe increments using a fully-online system, ensuring your console is adaptable and future-proofed.

FLX key features

- 2048 control channels (upgradable online to 4096)
